food prices. Since crops used for biofuels are both food and fuel, changes in oil prices affect edible crop availability. Lower oil prices can also influence a greater global demand for food, sending food prices higher. For a more complete explanation, read this [World Bank report](#).

Data sources:

Food Price Indices from the [UN](#), Brent Crude Oil data from [Quandl](#), Food riot data from the [World Bank](#) and [Thomson Reuters Eikon](#). Country trend data from [Thomson Reuters Country Risk Ranking](#).

Data sourcing and analytics by Brian Ullcny and Henry Chong

Data visualization Brian Romer

[Thomson Reuters Data Innovation Lab](#)

Methodology:

The riot severity metric is based on the following paper:
 Collins, William J., and Robert A. Margo. The economic aftermath of the 1960s riots: evidence from property values. No. w10493. National Bureau of Economic Research, 2004.
 The severity metric is described on page 852. It is the sum of the fraction of the number of deaths, injuries and arrests that occurred in each riot relative to the whole dataset. i.e. if there were 25 total deaths, 50 injuries and 100 arrests and if in a particular riot there were 5 deaths, 10 injuries and 10 arrests, then the severity of the riot would be: $.20 + .20 + .10 = .5$ (Maximum would be 3.0)

The stability figures come from:
 The Worldwide Governance Indicators project constructs aggregate indicators of six broad dimensions of governance:

- Voice and Accountability
- Political Stability and Absence of Violence/Terrorism (this is the one we are using)
- Government Effectiveness
- Regulatory Quality
- Rule of Law
- Control of Corruption

Empty stomachs, seething streets

Hunger is both intensely personal and inevitably societal. In fact, there is a direct correlation between food insecurity and social instability.

Food insecurity and social instability: 2007-2015

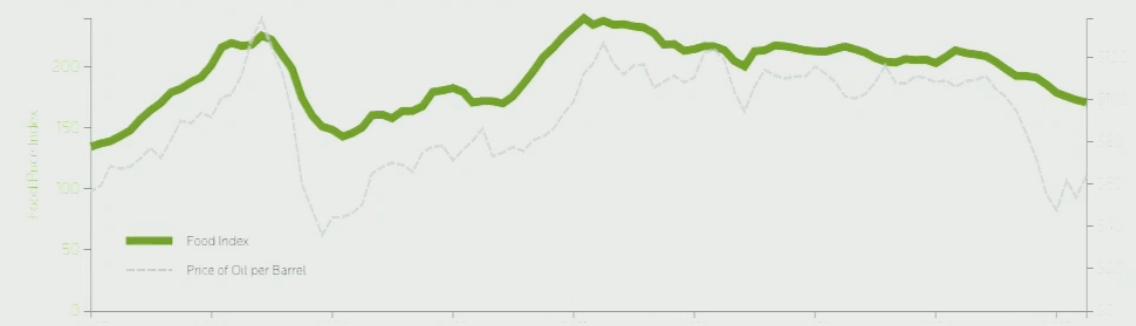

Affordable and available food helps form the bedrock of stable societies. When prices rise too high, or availability becomes too low, people frequently take to the streets out of frustration – and desperation.

The chart below tracks food-related riots globally since 2007 against food and oil prices. The most notable period for unrest is the cluster from 2007-2008, during the Great Recession, when both food and oil prices spiked. ... [continue reading](#)

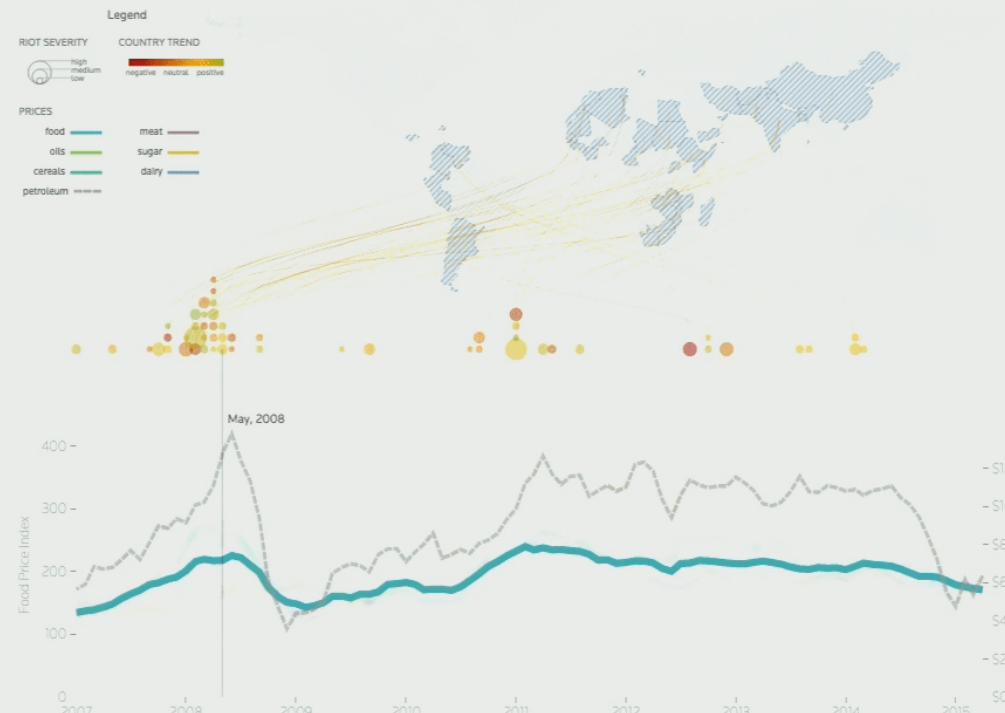

Riot severity based on the number of people arrested, injured and killed

Correlation between the price of oil per barrel and food price index

food prices. Since crops used for biofuels are both food and fuel, changes in oil prices affect edible crop availability. Lower oil prices can also influence a greater global demand for food, sending food prices higher. For a more complete explanation, read this [World Bank report](#).

Five people were injured when a pipe bomb exploded on an overpass near an Istanbul metro station on Tuesday, **the district mayor** said, halting some train operations and heightening security fears in **Europe**'s biggest city.

Turkey has been on high alert since more than 100 people were killed by two suicide bombers in the capital **Ankara** in October, three months after a similar attack at a town near the Syrian border in July left 33 dead.

Tuesday's blast near the Bayrampaşa metro station came at the height of the evening rush hour, **district Mayor Atilla Aydiner** told A Haber television. Bayrampaşa is a residential and industrial area on the European side of **Istanbul**.

Another broadcaster earlier reported that one person had been killed but **Aydiner** confirmed **only five injuries**.

    <![CDATA[
      Five people were injured when a pipe bomb exploded on an overpass near an Istanbul metro station on Tuesday, the district mayor said, halting some train
      operations and heightening security fears in Europe's biggest city. Turkey has been on high alert since more than 100 people were killed by two suicide
      bombers in the capital Ankara in October, three months after a similar attack at a town near the Syrian border in July left 33 dead. Tuesday's blast
      near the Bayrampaşa metro station came at the height of the evening rush hour, district Mayor Atilla Aydiner told A Haber television. Bayrampaşa is a
      residential and industrial area on the European side of Istanbul. Another broadcaster earlier reported that one person had been killed but Aydiner
      confirmed only five injuries. Grainy CCTV footage showed a large flash of light on the overpass followed by what appeared to be burning embers showering
      to the ground as cars drove below. Photographs on social media showed what appeared to be dozens of people walking alongside overground train tracks
      after trains had been halted. Although Istanbul's metro is largely underground, it runs above ground in some places, including around Bayrampaşa.
      Tuesday's blast was much smaller than the ones in Ankara and the town of Suruc near the Syrian border, which are believed to have been carried out by
      Islamic State militants. Turkey, a NATO member, has carried out air strikes against the Islamist insurgents in neighboring Syria as part of the U.S.-led
      coalition fighting the jihadist movement. Read more at Reutershttp://www.reuters.com/article/2015/12/01/us-turkey-blast-
